Professional Summary

Experienced **AI-Driven Full-Stack Software Developer** with 3+ years of expertise in building enterprise-grade applications using **React.js**, **Node.js**, **Python**, and **Azure cloud services**. Specialized in developing **RAG systems**, **microservices architecture**, and scalable process automation solutions. Demonstrated track record in open-source contributions and CI/CD implementation, consistently delivering measurable improvements in operational efficiency, system performance, and user satisfaction.

Professional Experience

Software Developer @ Equinix : **(Azure, RAG, NodeJS, ReactJS)** June 2023 - Present

- Built **HRGPT** - a **Retrieval-Augmented Generation (RAG) system** using **vector database** technology for HR assistance serving 500+ Employees. Developed **vectorization** pipeline for ServiceNow articles and deployed **webhook** in **Azure Function App**. Reduced HR query response time by **85%** and improved accuracy by **90%**. Established **CI/CD pipeline** using **GitHub Actions**.
- Designed **ChatGPT-like interface** using **React.js** for HRGPT frontend and deployed **Node.js** server on **Azure App Service**. Implemented **Python Function App** for chart generation and leveraged **Azure Cosmos DB** with **Redis** caching. Achieved **95%** user satisfaction and reduced latency by **60%**.
- Engineered **Full-stack application** to streamline user reassignment in **Coupa**, automatically transferring pending approvals to managers. Used **React**, **Node.js** and **MySQL**, reducing reassignment time by **80%**
- Streamlined work order approval process in **SAP FieldGlass** using **Node.js** for Backend Development, integrated with **MS Teams**. Users can approve/reject directly from Teams, reducing manual effort by **75%**.
- Automated supplier information visualization from **Coupa** to **Oracle Fusion** using **React** and **Node.js**. Reduced manual checking time by **90%** and ensured accurate data flow.

Software Developer Intern @ Equinix : **(ReactJS)** February 2023 - June 2023

- Built **DAG Visualizer** using **React** for Frontend Development to preview DAGs before deployment, reducing deployment errors by **30%** through improved task validation.

Software Developer Intern @ 5th Bridge Data Technologies LLP : **(ReactJS, NodeJS)** July 2022 - August 2022

- Implemented **Kendo grids** and **multi-step forms** in **React** for quote generation, developed **REST API** in **Node.js** for data management.

Backend Developer Intern @ Content Erra : **(NodeJS)** June 2021 - July 2021

- Designed **O(n) algorithm** to reduce manual effort by **50%** by summarizing disability benefits with page numbers.

Projects

Stock Exchange Application (GitHub) : **(React.js, Node.js, TypeScript, RabbitMQ, PostgreSQL, Prisma, Docker, Nginx)**

- Crafted **Full-Stack application** simulating **real-time trading** of stocks, containerized using **Docker** for efficient deployment.
- Engineered **4 microservice architecture** using **NodeJS**, **RabbitMQ**, and **PostgreSQL** for **asynchronous order processing**, leveraging **Prisma ORM**. Ensured **real-time updates** via **WebSockets**, employed **Nginx** for **Load Balancing**.

Open Source Contributions

LightDash (PR #12119) : **(ReactJS, NodeJS, TypeScript)**

- Implemented **auto-triggering threshold configuration modals** using threshold uuid, reducing manual configuration steps by **30%** and improving user experience.

Rocket.Chat (GSOC Organization) (PR #32475) : **(ReactJS, MeteorJS, TypeScript)**

- Implemented **Notify on Reactions** feature enabling users to receive notifications for reactions, boosting user engagement by **20%** in team interactions.

Cal.com (PR #18192) : **(NextJS)**

- Enhanced user experience by preserving question order during **booking process**, ensuring confirmation emails are more intuitive and accurate.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend & Databases: Node.js, Express.js, Redis, Kafka, RabbitMQ, PostgreSQL, MySQL, MongoDB, Azure Cosmos DB
Cloud & DevOps: Azure Function App, Azure App Service, Docker, NGINX, Git, GitHub Actions, CI/CD

Certification And Achievements

- **React.js** & **Node.js** Certifications - React | Node.js
- Solved **1100+ coding questions** in **GeeksForGeeks Leetcode InterviewBit**

Education

Mahindra University, Bachelor of Technology in Computer Science & Engineering, Hyderabad (CGPA: 8.5) July 2019 - May 2023
